

Payment Analytics – Executive Summary

1. Approval Rate Trend

2020 Q4: 62,86% | 2021 Q1: 61,48% | 2021 Q2: 60,34% | 2021 Q3: 59,42%

Insight: Continuous decline indicates structural trend, not noise.

2. Chargeback Rate

Stable around ~7.6%–8.0%

Insight: No evidence of increasing fraud pressure.

3. September 2021 – \$50 Deposits

1,803 unique customers

Total approved: \$113,634.87

4. Bank Performance

Top performer: BANK1002 (~69.8%)

Insight: Strong variation across issuers → issuer impact is significant.

5. Key Hypotheses

- Issuer bank policy changes
- Processing / antifraud configuration adjustments

6. Root Causes (Q3 2021 vs Q4 2020)

- Risk mix shift (ticket size / customer profile)
- Increased processing restrictions

Conclusion: Gradual decline suggests progressive risk tightening.

7. Chargeback Drivers

- Repeat suspicious customers
- Specific issuers
- Transaction patterns (e.g., \$50 testing behavior)

8. Senior-Level Analysis Focus

- Customer cohorts (new vs returning)

- Bank × Processor interaction
- Time-based patterns
- Retry behavior
- Full funnel analysis
- Fraud segmentation

Interview Statement

"I would focus on interaction effects between issuing banks and processors, as isolated analysis may hide the real driver."
